Written Responses

What activities of the course were most helpful for you, and why? 7

The in-class exercises, PSETs which were full marks and based on effort and completion, combined with self corrections I think was a really great idea because then it forces me to read what I got correct and incorrect. I really liked this. I thought the video documentaries provided in the class were well thought out and I like them.

In class discussions in tables

class discussions

I really liked the thought experiments that were posed throughout the lecture because they would help out a ton with understanding the topics best.

Homeworks, lectures, and discussions.

In-class activities were the most helpful because we were able to get engaged with the materials and it often helped bring up questions / work through any confusion while with others.

The lectures/in-class exercises were most helpful. I also enjoyed the econ in the wild assignments, which helped me apply what we were learning in real life.

What forms of feedback from your instructor were most helpful for you, and why? 6

written comments on my answers for each PSET was very helpful to my learning because it demonstrated to me what was incorrect and correct. The in-person discussions with the instructor was also incredibly helpful. I found her office hours invaluable.

Getting exam grading and getting to review and reflect on it.

I think the feedback on both homework and the in-person discussions were great in aiding our understanding.

Homework feedback and in-person discussions with the instructor.

Written comments were the most helpful because they were always very informative and helps me know where I did something wrong.

Written comments on assignments, discussions in office hours.

How did the learning environment affect your learning? 7

I liked the learning environment a lot because Prof. Long was very inclusive of all students and never outwardly said whether or not a study was wrong but rather included their answer suggest how the student's answer contributes to a particular part.

I liked that the readings before class were manageable and that we sat in tables

very friendly learning envirommetn

The learning environment was super welcoming and it was always a joy to be in class. It really helped with the whole learning process.

I really enjoyed Prof. Long's lectures. She is a very engaging speaker and she often brought baked goods and snacks to class for us to enjoy. I am vegan, and she made sure to accommodate my dietary restriction, which was very kind.

Class dynamics, student-student interactions, and student-instructor interactions helped my learning by providing a supportive space where thoughts can be shared.

The learning environment was really good. We did a lot of fun in-class activities + everyone was able to speak up in class and ask/answer questions.

What would have improved your learning in this course? 5

More games and Monte Carlo simulations.

I liked the class textbook and would have appreciated more systematic links to it as we progressed in class

Nothing. It's an amazing course.

I would have appreciated if the final was the day before spring break instead of the day after.

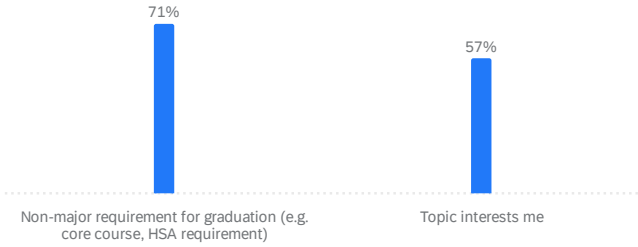

I believe that the course was designed and structured well.

Student Information

My class year is: 7

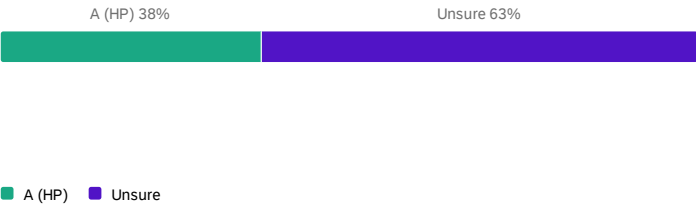

Why did you take this class? 7

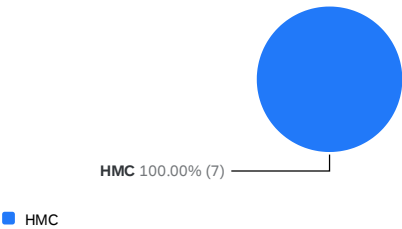

I filled out this form without the instructor present. 8 ⚠

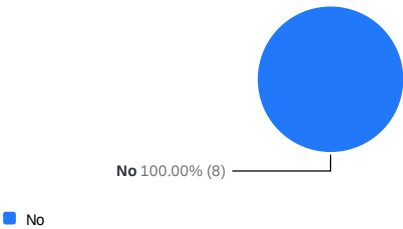

I expect my grade to be approximately: 8

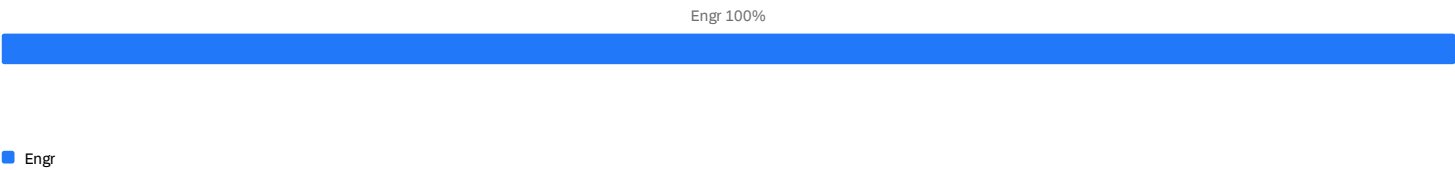

I am: 7

I filled out this form during dedicated class time. 8

Major: 6 ⚠
